Subject: RE: additional wells at ST12
Attachments: smime.p7s

Carolyn and Wayne-

Contracting sent Wood the additional scope attachment for review to see if Wood will need any additional information to prepare a proposal when the RFP is issued.

Don told me the technical team and senior management are reviewing it. I asked Don and Stu to look at the latest proposed locations in light of recent results to see if any revisions are recommended.

We are going to review the figure and most recent well chart in our BCT call next week.

Thanks.

Cathy

Subject: additional wells at ST12

Carolyn and Wayne-

I submitted the well package to contracting on 6/20. Williams contract issues held up the SS17 mod (it has now been awarded) and the ST12 well modification mod. The well modification mod has not been sent to Wood yet.

I need to revise some of the well package paperwork and send it back to contracting which should not take long. Goal would be August/Sept. award.

We still owe you responses to your comments and an updated figure.

I will keep you posted.

Plan is to mod Wood's contract and it does not need to be competed. Thanks.

The contracting package has been revised and is back to me for review.

I hope to get it in to contracting this week. Once I get the package to contracting, I can get an estimated award date.
Thanks.

Subject: Update on CZ23 results

Carolyn and Wayne-

The sampling results for benzene concentrations at CZ 23 for March, April, and May (two samples) 2019 were 47, 31, 38, 51 ug/L, respectively. A groundwater sample will be collected at CZ 23 the week of 17 June 2019.

As discussed in the May 2019 BCT meeting, the AF is proceeding with construction of additional piping/trenching, wellhead modification, and installation of a pump to begin groundwater extraction at CZ 23. The construction is scheduled to start next week (17 June 2019) and will take ~3 weeks. Extraction will continue at CZ 07 concurrently with CZ23 extraction.

Please let me know if you have any questions.
